

Embed Prezi's in Moodle

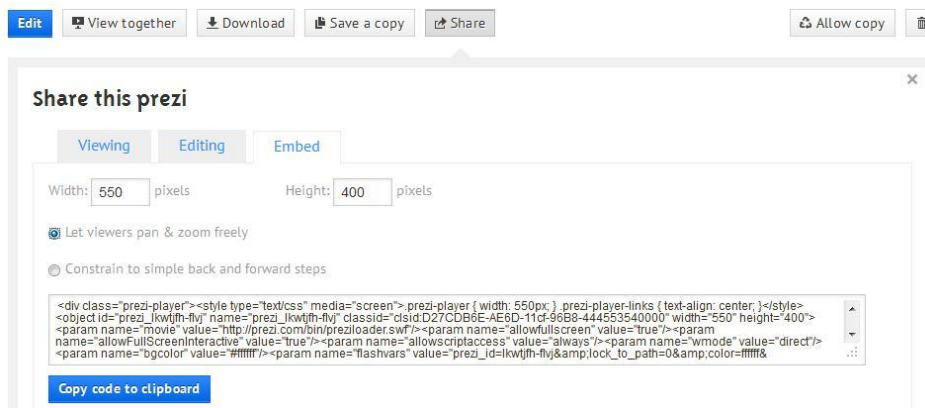

On the course front page in the **Add a Resource** section, **create a page**. This page will hold the Prezi (or a number of Prezi's).

1. Open a new tab in the browser and locate the Prezi.

Under the play timeline, click on **Share**. This will display different sharing options.

2. Click on the **Embed** option. This will display HTML code.

Copy the code by clicking the blue button: Copy code to clipboard.

3. Return to the web page in Moodle where you would like to add the Prezi. Add some text (any text) to act as a placeholder for the Prezi.
4. As you have copied HTML code, you will need to paste in code view. Click the HTML button on the toolbar.
5. Paste the code and click the green **Update** button for code view. This will embed the Prezi on the page.

6. Scroll to the end of the page and click on **Save and display** to view the Prezi on the page.
